

Technical Documentation for CARSHBOC02.dbf

The file **CARSHBOC02.dbf** contains population estimates by county, age, race, sex, and Hispanic Origin for 2000-2002. These estimates were developed by the U.S. Census Bureau through the Federal-State Cooperative Program for Population Estimates. They are based on a cohort-component methodology in which different death rates and migration rates are applied to each age group as it grows older.. These estimates were released on September 18, 2003 and they are scheduled to be updated on an annual basis.

Comparable estimates for other states can be obtained from the Census Bureau's website,
